

DUNG BEETLE BENEFITS

Wednesday 16th March 2022

Russ Barrow will be presenting information on the benefits of using Dung Beetles in farming. The workshop will cover information on the following

- How Dung Beetles may improve soil chemistry (e.g. carbon) on properties.
- How to manage them with reference to drenching regimes,
- How to identify them and how to trap them.
- How to create nurseries on properties that will allow species to breed and be released en masse to give seasonal coverage throughout the year.

The day will include

- Information session on the benefits and of dung beetles
- Barbecue Lunch
(please advise of any dietary requirements when registering)

Bring

- Suitable footwear
- Sun protection including a hat and sunscreen
- Water bottle
- Face mask
